

Serving many is our Business.

Serving one is our Privilege.

We recognize that our success is directly tied to the benefits our customers experience. Sometimes that success requires a special design for a special patient.

Comfortex is proud of our ability to design custom surfaces for unique needs. Providers like the Mayo Health System, Good Samaritan, Christ Health, the VA and others, have reached out to Comfortex with unique patient conditions and/or needs.

Our staff will work quickly to design & produce surfaces that can help the provider meet the unique challenge. This service is often donated to the provider in a spirit of co-operation and with an understanding that responding to the unique, is a **Reflection of Excellence...**
...An effort that improves us all.

Our 40-years of manufacturing for Hospitals & Nursing Homes has equipped Comfortex with the knowledge and experience that can equip healthcare providers with tools that compliment the care they provide.
